

Custom Furniture Design

www.vaughndesigns.net

At Vaughn Designs we design and construct unique furniture and cabinetry which encourages the marriage of art and function. Each item is meticulously designed with a thematic approach - i.e. the incorporation of distinctive wood grains formed into shapes within the finished piece. For example, in a kitchen with an Asian theme - a curvilinear Koi fish subtly emerges from the seascape of the natural waves of cherry wood. (See photo). We listen attentively to our clients needs and make them our complete focus.
